

II PVC : Production process and waste management

INDEX

1. ZERO WASTE FROM THE MANUFACTURING PROCESS OF PVC PRODUCTS

2. WASTE MANAGEMENT

The classification of PVC waste according to the codes C.E.R.

THE STANDARDS UNIPLAST 10667 FOR THE RECYCLING OF PLASTICS: from waste to secondary raw materials (MPS)

Waste recovery activities in a simplified procedure

The energy recovery of PVC

The REACH regulation

1. ZERO WASTE FROM THE MANUFACTURING PROCESS OF PVC PRODUCTS

The definition of "refusal" is based on the concept of "discard", which constitutes the necessary and sufficient condition for an object, a good or a material to be classified as waste and, subsequently, codified on the basis of the existing European list of Waste (CER). Article 183 of Legislative Decree No. 3, 2006 N ° 152, in fact, defines refusal "any substance or object of which the holder discards or has the intention or is obliged to discard".
